DETAILED ACTION

This Office action is in response to applicant's RCE filed on 18 December 2006.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's amendment filed on 18 December 2006 has been entered.

Allowable Subject Matter

2. Claims 1, 3-4, 6, 11, 23, 25, 31-35 are allowed.
3. The following is an examiner's statement of reasons for allowance:
 - Claims 1, 3-4, 6, 11, 34-35 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method for manufacturing a semiconductor device that includes the step of subjecting at least a portion of a single layer metal gate electrode material having a work

function to at least one of a plasma silicidation or plasma germanidation process to cause the portion to be converted into a plasma altered metal gate electrode with a different work function, wherein the metal gate electrode material and the plasma altered metal gate electrode are subsequently patterned to form a first gate electrode having the work function and a second gate electrode having the different work function, and wherein source/drain regions are subsequently formed proximate the first and second gate electrodes; and

- Claims 23, 25, 31-33 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method for manufacturing an integrated circuit that includes the step of subjecting at least a portion of a single layer metal gate electrode material having a work function to at least one of a plasma silicidation or plasma germanidation process to cause the portion to be converted into a plasma altered metal gate electrode with a different work function, wherein the metal gate electrode material and the plasma altered metal gate electrode are subsequently patterned to form a first gate electrode having the work function and a second gate electrode having the different work function, and wherein source/drain regions are subsequently formed proximate the first and second gate electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
